

- Where possible, release skates and rays from the side of boat
- Only inboard a fish when absolutely necessary
- NEVER use a gaff

Whenever possible,
lift a skate or ray
to move it

Hold or lift a skate or ray
under mid-body and
base of the tail

Avoid contact with the
gills and spiracles, which
can be easily damaged

Dragging or holding a skate
or ray solely by its tail can
easily damage the animal
