**Actual size of a Blonde Ray eggcase.**

**Rostroraja alba**  
Capsule length: 13–15cm  
Limited range

**Dipturus intermedius**  
Capsule length: 15–20cm  
Previously known as Common Skate.

**Dipturus batis**  
Capsule length: 13–15cm  
Eggcases rarely reported to the Great Eggcase Hunt.

**Raja brachyura**  
Capsule length: 10–12cm

**Raja microocellata**  
Capsule length: 7–8cm

**Raja clavata**  
Capsule length: 6–7cm

**Raja undulata**  
Capsule length: 7–8cm

**Raja montagui**  
Capsule length: 5–6cm

**Rostroraja alba**  
Capsule length: 13–15cm  
Limited range

**Dipturus intermedius**  
Capsule length: 15–20cm  
Previously known as Common Skate.

**Dipturus batis**  
Capsule length: 13–15cm  
Eggcases rarely reported to the Great Eggcase Hunt.

**Raja brachyura**  
Capsule length: 10–12cm

**Raja microocellata**  
Capsule length: 7–8cm

**Raja clavata**  
Capsule length: 6–7cm

**Raja undulata**  
Capsule length: 7–8cm

**Raja montagui**  
Capsule length: 5–6cm

You may know these species as dogfish, but they are in truth catsharks, as true dogfish give birth to live young.

**Leucoraja naevus**  
Capsule length: 6–7cm

**Raja montagui**  
Capsule length: 5–6cm

**Scyliorhinus canicula**  
Capsule length: 5–7cm

**Galeus melastomus**  
Capsule length: 4.5–6.5cm  
Deepwater species, eggcases rarely reported.

**Scyliorhinus stellaris**  
Capsule length: 8–10cm

**Amblyraja radiata**  
Capsule length: 3.5–4.5cm

**Raja microocellata**  
Capsule length: 7–8cm

**Raja clavata**  
Capsule length: 6–7cm

**Raja undulata**  
Capsule length: 7–8cm

**Raja montagui**  
Capsule length: 5–6cm
